CREAMETAL AG INFO LETTER / JUNE 2024

Summer is here! It brings sunshine, warm days and also our exclusive summer sale! Take the opportunity to equip your workshop with first-class machines and equipment at top prices.

We wish you a wonderful, relaxing summer!

Mario Weber
and the entire CREAMETAL AG team

Revised welding gauge CREA-STAR - 35% reduction until the end of August 2024

Take this opportunity to secure a second-hand CREA-STAR. Until the end of August 2024, we are offering a 35% discount on the new price of completely overhauled machines! Insert the bars, adjust the shears, weld: With the patented CREA-STAR welding jig, you can produce railings in half the time. This tried-and-tested product has already proven itself many times over - tens of thousands of metres have already been produced on the CREA-STAR. Take advantage of our offer now and benefit from a first-class machine at a top price! Dispatch and packaging ex works.

CREA-TAPP for thread tapping - now for CHF 1'950 instead of CHF 2'340

With the CREA-TAPP, you can cut precise and vertical threads effortlessly and efficiently. It impresses with its powerful, air-driven motor, which cuts threads from M3 to M12. Thanks to the ball-bearing design, the air motor always remains vertical, which means that the torque is optimally absorbed. This leads to a considerable reduction in wear and damage to the cutting tools. In addition, the CREA-TAPP offers a generous working radius of 800 mm, giving you maximum flexibility and freedom of movement. Take advantage of the summer sale now, CHF 1,950 excl. Shipping and packaging ex works.

Review of our team event

We experienced two adventurous days in mid-June. Our event began with a tour of the SFS Group's central warehouse in Rebstein/SG. We were fascinated by the impressive efficiency and technology of the automated warehouse. This was followed by a scavenger hunt through Chur, where we explored the city in a fun way in small teams at the Pub Hunt. The day ended in a cosy atmosphere at the Hotel Restaurant Sommerau. On Saturday, we visited the Furggels fortress above Pfäfers, once the largest armed fortress in Switzerland. In short: our team event was a complete success!

In-house production: From sheet steel to CREA-WHEEL

Our in-house production plays an important role in the manufacture of the CREA-WHEEL levelling machine. The production team has processed more than a tonne of sheet steel in recent weeks. Through precise laser cutting and advanced machining on our Mikron milling machine, we have laid the foundations for the assembly of the base plates. The use of our own innovative technologies such as the magnetic clamping plate and an efficient handling system has significantly optimised the production processes. This has not only enabled us to achieve seamless production, but also guarantees the quality and precision of each individual base plate, which serves as a robust foundation for the CREA-WHEEL.
