CREAMETAL AG NEWSLETTER / DECEMBER 2023

New machine for the machine manufacturer

In November, we received a second-hand Hämmerle folding press - a milestone for sheet metal production in our company! 14 tonnes of Swiss engineering expertise are at our disposal in Kappelen. With constant precision during bending and consistent pressure distribution via a patented hydrocushion, we will take our sheet metal production to a new level. Even the most complicated bending sequences with different angles in a single operation, we can realise easily. The CNC machine control gives us full control over the production process.

**THE CREAMETAL TEAM WISHES YOU A
VERY HAPPY FESTIVE SEASON!**

CREA-TUBE CHRISTMAS PROMOTION

620 CHF new only 500 CHF

Until 31.12.23

CREA-TUBE in the Christmas special

With the CREA-TUBE tube centring device, steel and stainless steel profiles can be precisely positioned before welding. With different diameters, the collets centre the middle axes. Clamping elements are integrated for square material. The angle is freely adjustable from 50 to 180 degrees - ideal for railing production. Just in time for Christmas, we are selling the TUBE with a special discount of CHF 120.

Review of the Blechexpo trade fair

At the leading trade fair for sheet metal processing, our team had the opportunity to hold many exciting discussions with the metal construction industry and to gain an impression of upcoming innovations. We would like to thank everyone for their interest and support. It was a pleasure, see you next time!

Matteo Longa is new to the team

Would you like to find out more about the team behind CREAMETAL AG and how we work? In our exclusive interview, our youngest team member Matteo Longa talks first-hand about ... :

- ... his current projects
- ... the fascination of our craft
- ... his goals for the coming year

In short: Matteo gives an insight into how talent and passion come together at CREAMETAL to achieve exceptional results.

CREAMETAL in the metal trade journal

We look forward to reading through the November issue of AM Suisse's Swiss trade magazine Metall. We are represented in this important industry magazine with two exciting articles! One article presents our innovative special machine for Stebler Glashaus AG, which significantly reduces the time required for drilling work.

The second article is dedicated to our ultra-modern CREA-WHEEL levelling machine. This machine with its patented and unique setting technology is not only an example of our technological expertise, but also our claim to the highest quality and efficiency in the metalworking industry.
