## BAU Munich: Trailer video of the straightening machine for round and square steel

From January 13 to 17, 2025, we will be at the world's leading trade fair for architecture, materials and systems. **Watch our trailer to see how the new straightening machine for round and square steel CREA-WHEEL RRM works:** precise straightening of round, square and flat steel - more versatile than ever. Visit us at stand C1.301 and experience the machine live in action!

---

## Machine park expansion: the new lathe has been delivered

With the modern Hyundai-Kia SKT21L, we are setting new standards in our metal processing. It enables even more efficient and precise turning, whether for individual pieces or series. Thanks to modern control systems, we can respond even more flexibly to your requirements.

## From production: straightening machine for round and square steel

Our straightening machine for round and square steel CREA-WHEEL (RRM) is impressing more and more customers throughout Europe. With **precision and Swiss-made quality**, it straightens round, square and flat steel and sets new standards in metal processing. The high demand makes us proud - so much so that we were allowed to work extra shifts at the end of the year. Many thanks to our customers and partners for their trust!
