

## OUR SERVICE TECHNICIAN

JÜRIG SCHLECHTEN IS THERE FOR YOU.

At CREAMETAL Ltd., our service goes beyond the provision of innovative products – it also extends to service work. Our Jürg Schlechten is at your side with expertise and passion to support you with maintenance, repairs and individual requirements of our products. We understand that long-lasting machines depend on reliable service. And so we are interested in offering you to offer you expert support.

## CREAMETAL Ltd.: THE IDEAS FACTORY

Since our foundation in 1997 in the Matte quarter of Bern, we at CREAMETAL Ltd. have experienced continuous development. Our head office has been located in Kappelen near Biel for many years, from where our team develops, produces, maintains and distributes innovative products for the metal trade, particularly in the field of railing construction. Our network of sales partners is constantly growing and professionalising, while the team and our expertise are continually expanding.

### FREE TICKET FOR BLE.CH

This year, we are particularly looking forward to BLE.CH in Bern, the leading trade fair for sheet metal, metal and steel processing in Switzerland. We cordially invite you to visit us in person at our stand between 13 and 15 March 2024. We look forward to stimulating discussions and exchanging contacts. Scan your free ticket with this QR code and get free access to the trade fair. Promocode: 0680497645

### GET IN TOUCH WITH US

Our managing director Mario Weber will be happy to advise you personally and demonstrate our machines to you without obligation.

### THE CREA-WHEEL – OUR INNOVATIVE LEVELLING MACHINE

On the following pages, we invite you to immerse yourself in the world of precision and efficiency, especially with our flagship product, the CREA-WHEEL. Find out how this innovative levelling machine sets new standards in railing construction and takes your production processes to a new level. We would also like to invite you to discover the performance of our entire product range. Find out how CREAMETAL Ltd. is helping to shape the future of the metalworking trade with good ideas and advanced technology.

### THE CREAMETAL Ltd. TEAM

We are at your disposal with expertise, passion and a sense for innovative solutions at your disposal. *Step into the idea factory – welcome to CREAMETAL Ltd.*

## CREA-FIX

### Post welding jig for head, foot and end plates and handrail shells

Post welding jig for fast and efficient welding of plates and handrail shells. Simply set the end stops to the desired values with the help of the measuring scales. Symmetrical or off-centre positioning and welding of plates, for individual or series production. Fast, accurate and efficient.

## CREA-SWISS

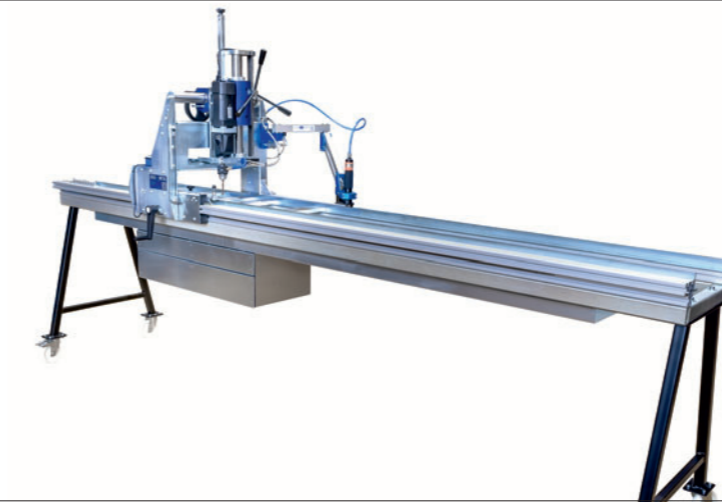

### Welding gauge for frame construction

The "one man device": Setting outer dimensions, inserting profiles, adjusting height differences and completing welds on both sides. Perfectly suited for steel windows, fire protection doors or angle steel frames: Produce perfect frames with CREA-SWISS – quickly, accurately and profitably.

## CREA-STAR

### Welding gauge for railing construction

Quick and easy handling with up to 50% time and cost savings: No calculating, inserting bars, adjusting scissors or welding. Railings for stairs and balconies, window grilles or fences: the CREA-STAR welding gauge can be used in a variety of ways for all components that require division of rods.

## CREA-DRILL

### Multifunctional drilling center – our bestseller

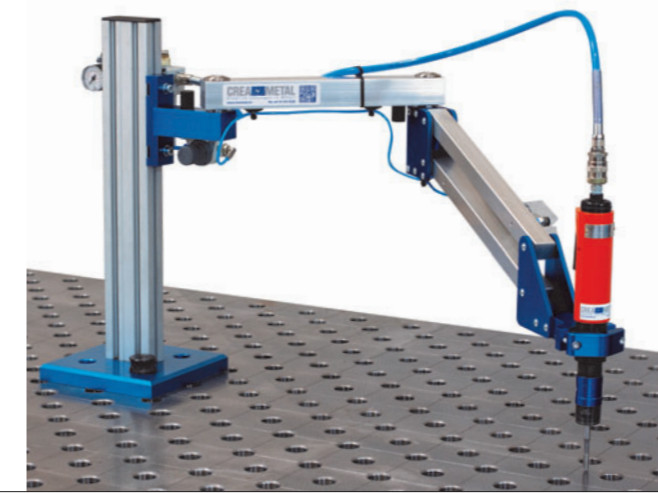

Clamp the workpiece and start drilling. Thanks to CREA-DRILL time-consuming measuring, scribing and punching is no longer necessary. With at least 50% time savings, it is ideal for efficient individual and series production. In addition to conventional drilling, flow hole and thread forming as well as core drilling are made easy. Significantly reduces manufacturing costs.

## CREA-TUBE

### Tube centring device for fast and accurate centring and clamping of tubes

The tube centring device, an innovative tool for correctly aligned butt joints of tubes. The entire weld seam is accessible with the weld torch. Clamping jaws also center tubes of different diameters.

## CREA-TAPP

### Thread-cutting – fast, accurate and perpendicular

CREA-TAPP, the thread-cutting device cuts accurate and perpendicular threads. Powerful pneumatic motor with right-left rotation and push-pull control. Significant reduction of wear and tear and damage to the cutting tools.

## CREA-HEAVY

### Plate gauge for steel construction – "the third hand"

The CREA-HEAVY plate gauge – lightweight yet robust. Simply set the plate offset to the desired value with the help of the measuring scales. Quickly position the gauge using the screw clamp and place the plate on top. Simple compensation of tolerances. Simply spot weld the plate at the correct height and positioned sideways. The "third hand" that you have always been missing.

## CREA-WHEEL

### Rational metal straightening

With this machine-building innovation, you can straighten lath or flat steel five times faster and more efficiently than ever before. The CREA-WHEEL is easy to use. Just set the stack thickness in two seconds and off you go. The stack is automatically fed onto the infeed rail and out the other side by turning the WHEEL. You stack ten packs per minute.
