

# CREAMETAL NEWS

---

NEWSLETTER OF CREAMETAL / FEBRUARY 2024

---

I would like to thank you very much for the trust you have placed in us and for working with us as partners. With a positive outlook on the year ahead, I wish you fulfilment, happiness and good health.

**Mario Weber**  
and the entire team at CREAMETAL AG

---

## Outlook 2024 - our machines and devices

After a brief period of reflection and calm, the machines are back in full swing here in Kappelen. We are happy when we look back on the past year. We have successfully pursued our goal of making our products available in other countries on the European continent. In addition to the further development of all our products, we have expanded and deepened our network in metal construction circles in order to understand the needs of the market even better. Browse through our brochure and be inspired.

## Our service technician Jürg Schlechten: the man for long-lasting machines

Our CREA team has continued to grow over the past year, particularly in the service area, where we can now offer our existing customers new opportunities. The recruitment of Jürg Schlechten as a service technician was a further step towards increasing the longevity of our machines and gauges, which are used outdoors by our customers. Please do not hesitate to contact us directly if you would like to utilise Jürg's services.

---

## The plate gauge for steel construction

The CREA-HEAVY panel gauge - lightweight yet robust. The height offset of the panel can be set to the desired value using the measuring scale. A screw clamp is used to quickly position the gauge and place the panel on it. This makes it easy to equalise tolerances. Simply attach the panel at the correct height and positioned laterally. The CREA-HEAVY is the "third hand" that is otherwise always missing. **The price for the CREA-HEAVY is CHF 260 excluding VAT.**
